

ARTsome ASTRONOMY

Science inspiring art – Art empowering science!

Rocket through the solar system through the lens of an artist! Fuse art, science and storytelling and learn how to:

- Engage students in space science education as artist explorers.
- Inspire students by fusing art, science and storytelling.
- Explore the development of viewing objects in space from the naked eye to remote sensing.
- Analyze the mysterious surfaces, make sense of what one sees, hone observation skills and inspire questions.
- Deepen understanding of celestial objects when observing them through an artist's lens.
- Create art inspired by planet and celestial images from remote sensing technology.

**Great opportunity for teams of teachers to create a collaborative interdisciplinary unit.
Create a beautiful piece of art while exploring the story of celestial objects.**

ARTsome Astronomy I

St. Elizabeth Seton Elementary School
Rapid City, SD
June 3-4, 2019 // 8:30-5:00

Explore the story of terrestrial celestial objects (planets, comets, asteroids). Integrate STEM and art elements and principles of design to produce 2-3 pieces of art after exploring a variety of mediums and techniques.

ARTsome Astronomy II

St. Elizabeth Seton Elementary School
Rapid City, SD
June 5-6, 2018, 2017 // 8:30-5:00

Explore the story of gaseous celestial objects (sun, stars, galaxies). Integrate STEM and art elements and principles of design to produce 2-3 pieces of art after exploring a variety of mediums and techniques.

Fee: \$160 (Includes art supplies, materials and resources)
One Graduate Credit Hour Available (\$45), University of Sioux Falls

Instructors

DeVee Dietz, MEd, an educator with over 30 years of experience and high school art teacher, has taught K-12, Adjunct Professor for Elem Art Methods & Curriculum, has provided visual arts professional development for inservices, workshops, and art education conferences.

Dr. Marie Steckelberg, an education “life toucher” for over 35 years, has taught science in K-12 and informal education settings, science education at USD and provides STEM professional development for classroom and informal educators.
